

Make an oversize wooden dice

From Home on 129 Acres

<http://homeon129acres.wordpress.com/>

The template below is scaled for a 6x6 block that is approximately 5½ inches on all sides.

Use it as a stencil or a pattern to draw an outline that you can fill in.

If you want your die to be true to life, I've consulted my Yahtzee game, and included the layout for how the faces go together at right.
